Cyprus has developed as one of the world's most promising international business centers, one of the most attractive European jurisdiction for multinational investments and an ideal location for a regional base of operations in Europe, Middle East and North Africa.

With 62 Double Taxation Agreements, an efficient low-tax system with international protections, a conducive intellectual property regime and full EU membership, Cyprus offers numerous strategic advantages and is abounding with new investment opportunities.

Cyprus is one of the fastest growing investment fund centers in Europe, adhering to best practice of fund investor protection and anti-money laundering policies. Efficient regulations facilitating the establishment and management of alternative investment funds and venture capital investment funds have successfully posed Cyprus a uniquely competitive entry point to the EU.

Please join us to learn more about the opportunities in and through Cyprus but also to speak with top Cyprus government officials and with the international investment practitioners that are leading the way in Cyprus.

A networking reception and qualified B2B meetings will follow the Business Forum.
